

Your Data Product Maturity Assessment

Generated 23 March 2026

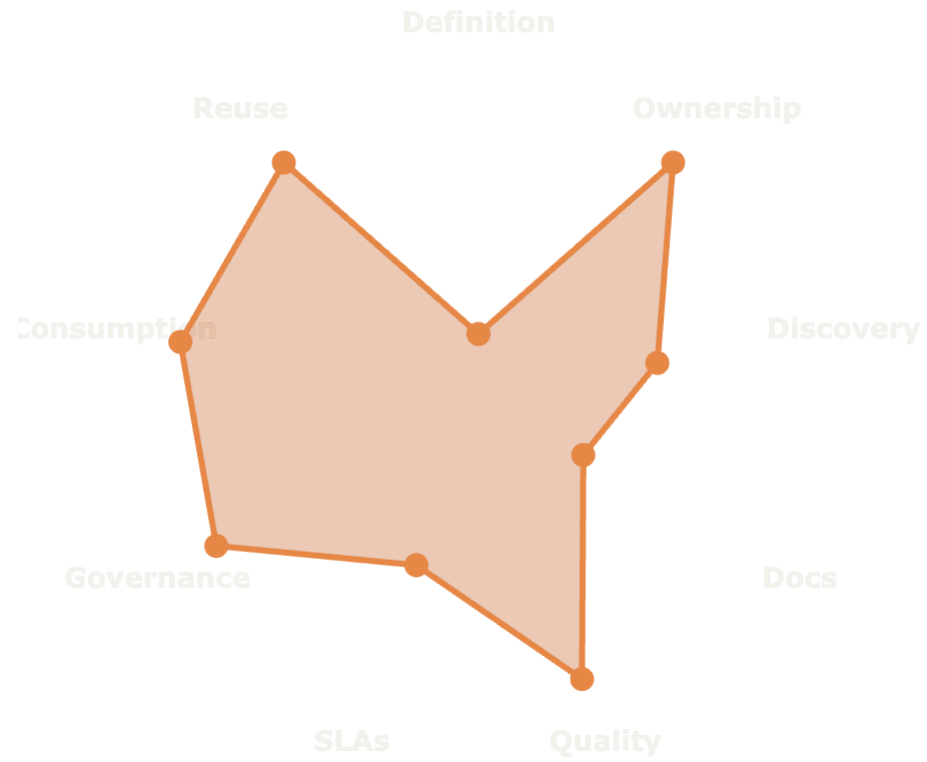

LEVEL 1

Ad Hoc

What this means for your organisation

Reactive, unstructured approach. Data is a byproduct, not a product. No standards exist and delivery is inconsistent. Your weakest dimension is defining your overall maturity level.

Dimension Scores

Definition & Scope		L1
Ownership		L5
Discoverability		L3
Documentation		L2
Quality		L5

SLAs & Reliability		L3
Governance		L5
Consumption & Value		L5
Reusability		L5

Dimension breakdown at a glance

Lowest Dimension

⚠️ Definition & Scope

Your Strengths

- Reusability (L5)
- Consumption & Value (L5)
- Governance (L5)
- Quality (L5)
- Ownership (L5)

Recommendations to Advance Your Weakest Dimensions

Definition & Scope L1 → L2

Start by informally documenting what data this product contains and who the intended consumers are. Hold a scoping session with key stakeholders.

Documentation L2 → L3

Maintain a living data dictionary with field-level descriptions, lineage, and example queries updated per release.

Discoverability L3 → L4

Add usage ratings, SLA information, and lineage to your catalog. Enable consumer reviews and trusted-dataset badges.

SLAs & Reliability L3 → L4

Automate SLA monitoring and build dashboards visible to consumers. Set up alerting and escalation for breaches.
